BROADCAST

We use various **technologies** such as live streaming, video on-demand and video conference to broadcast the event to your audience.

FORMAT

We offer different formats such as interviews, debates and panel discussions. The **recordings** take place in a studio setting or at a location of your preference.

CUSTOM MADE

We assist you in translating your live event into a digital or hybrid event. We combine the right technology with the best format to create an **impactfull event**.

| HYBRID

LIVE vs DIGITAL

We are always looking for the best way to connect the attendees of the **live event** with the participants of the digital event.

LOCATION

We digitally connect different small hubs (small live events at different locations) with each other to form **one large event**.

TOGETHER

We ensure that everyone - live or digitally - is involved in the event. Everybody can participate, **nobody should miss the event**.

The Event Pilots

| HUMAN

EXPERIENCE

Experience is key when organizing events. To give participants of a digital event a **unique live experience**, we send them a personalized **Event Box** prior to the event.

CONNECTION

We stimulate **human connections** with networking technology tools and **connect the participants** via an online communication platform.

SAFETY

We guarantee a **safe environment** for all speakers, employees and participants during all stages of the event.

EVENT BOX

BRING THE EXPERIENCE TO YOUR AUDIENCE

Upgrade your digital event with a personalized Event Box. This is a great way to involve your audience in the event.

Participants will receive an Event Box **delivered to their home or office** prior to the event. They will be surprised with elements that they experience at a live event.

The appearance of the Event Box is fully in line with the **corporate identity of the company** (logo, baseline and colors). The content is determined by the message you want to bring. Together we translate your story into an impactful Event Box.
